

<u>Technical Seminar: Protection Strategies for Radon</u> (Jointly organized by HKIOEH, HKRPS and HSEO of PolyU)

A seminar for occupational hygienists, health and safety officers, environmental scientists, engineers and all those who concern the protection strategies for Radon.

Radon is a natural occurring radioactive gas in our environment. The main goal of radiation protection for all exposure situations is optimization to ALARA but it leads to a question 'How low is enough'. In this seminar, Mr. S. T. Yip will discuss the IAEA recommended strategies for the protection against radiation of radon and natural sources for workers and the public.

The details of the programme:

Date: 07 Aug 2014 (Thursday)

Time: 7:00 – 8:30 p.m. (6:45 pm Registration)
