## Open seminar on

**“Prevention and protection from gas poisoning while at work in confined spaces”**

**A Joint activity with Occupational Safety and Health Council (OSHC)**

### Briefing

The latest revision of the "Code of Practice for Confined Spaces Work" has been released since 30<sup>th</sup> November 2024. The industry should take appropriate measures to implement the legal requirements. Only by fully understanding the requirements we can protect our employees. However, based on the past experience, gassing incidents, such as "hydrogen sulphide" poisoning, are among the most common serious accidents. In view of the hazards, to raise awareness on the importance of appropriate environmental air monitoring methods and the use of suitable personal protective equipment, OSHC and the HKIOEH decide to hold an **online open seminar** on 26 March 2025. We have invited representative from the Labour Department and experts from the industry to share their views and work experiences in the open seminar.

職業安全健康局  
OCCUPATIONAL SAFETY & HEALTH COUNCIL

HKIOEH

香港職業及環境衛生學會
